

Rapid Stop Barrier

Protect pedestrians at events

Australia is home to many great events each year, attracting massive crowds. Unfortunately, these events are sometimes a target for terrorism.

In this day and age, event management teams have to go the extra mile to be sure crowds are safe, and are able to be efficiently evacuated if there is an emergency.

PROTECT PEDESTRIANS AT EVENTS

That's why our fleet at Road Safety Rental offers the Rapid Stop Barrier. These temporary barriers for hire stop vehicles in their tracks, and are fully portable. They offer event managers a proven solution to mitigate the risk of hostile and errant vehicle entry into events or work zone areas.

The product has been designed to offer maximum protection, quick deployment and peace of mind for event organisers and patrons for any sizeable event or festival.

Benefits of choosing the Rapid Stop Barrier include:

RELIABLE

This type of temporary errant vehicle protection for rent has been independently crash tested to confirm it can stop a 2270kg pickup travelling at 60km/h. For full details refer to NATA test report 21140 01.

UNOBTRUSIVE

Rapid Stop Barrier is unobtrusive and allowing free flow of foot traffic through the system, even allowing easy access for prams and wheelchairs. It does not inhibit the timely evacuation of pedestrians in case of an emergency.

COMPLETELY PORTABLE

Our hostile vehicle protection for hire is freestanding and unanchored, which allows easy installation for temporary applications - the only requirement is a flat surface!

DISABLED AND EMERGENCY ACCESS

Rapid Stop Barrier's low height module allows for easy disabled access, whilst the innovative gate solution simplifies emergency services ingress and egress
