

RoadQuake[®] 2F Crib

Road Safety Rental offer a unique RoadQuake Carrier System, the Crib. The Crib option can be fitted to any pintle tow hitch and we recommend only 3 strips of RoadQuake be included with smaller utility vehicles and for larger 4WD type vehicles or smaller trucks, we would supply with 6 x RoadQuake rumble strips.

This fully integrated cargo carrier has been designed specifically for the safe transport, deployment, removal and storage of RoadQuake. This can be utilised in combination with the T Handle for safe lifting and re-stacking.

Simple design allows for easy & safe deployment.
