## V20 TOWER LIGHT

The V20 is a brand-new lighting tower equipped with 4 x 300W high efficiency LED lamp floodlights. More than 180 hours of running time and one of the lowest sound pressure level in the industry: only 58 dB(A) @ 7 meters.

The lighting power of 4 x 300W LED Floodlights is comparable to the one of a traditional 4 x 1000W Metal Halide lighting set. The V20 lighting tower is equipped with a low consumption diesel engine and a digital controller specific for lighting towers.

**Low Voltage LED**

The LED floodlights installed are powered with 48 Volts. No more high voltages on external cables. Safety as a must!

**Control Unit**

A digital controller specifically studied for our lighting towers! Now every function of the machine can be managed by only one controller for the best ease of use.

**High Quality Lamps**

4 x 300W High Efficiency LED floodlights. Tower Light.

**Top Accessibility**

3 doors for a wider access. 2 Compass-top doors with <<wing>> shape provide a complete access to the engine for a safe and convenient maintenance. 1 Back door allows the access to the digital control panel

**The Lowest Noise Level!**

Innovation means also decreasing the noise level! The V20 lighting tower emits only 58 dB(A) @ 7 meters.

**Brand-New Stabilisers**

The special shape of the adjustable stabilisers allows the operator to level the V20 in few seconds.

Technical Data

Lifting system	Hydraulic
Min. dim.	220 x 140 x 244cm
