- ✓ Ideal for daily installation across road zones at any speed
- ✓ Temporary - no nails or glue needed
- ✓ Quick and easy - one person can easily assemble and install in minutes
- ✓ Successfully tested up to 120km/h
- ✓ Minimal movement
- ✓ Durable

RoadQuake CRIB

- ✓ A fully intergrated carrier
- ✓ Designed for the transport, deployment and retrieval of RoadQuake
- ✓ Reduces stress on workers and deployment/retrieval times

RoadQuake is designed to reduce accidents and save lives, by alerting drivers to changing road conditions. RoadQuake significantly reduces the major causes of work zone accidents, when the driver is:

- driving too fast for conditions
- following too closely to the car ahead
- making improper lane changes
- fatigued or distracted

RoadQuake helps road users avoid accidents by providing significant sounds and vibrations throughout the vehicle, alerting drivers to pay attention to what is happening on the road up ahead.
